**DETAILED ACTION**

***Response to Amendment***

1. The amendment filed on 01/05/2005 has been entered, made of record and is sufficient to overcome the previously cited reference (s). Claims have been renumbered 1-19.

***Allowable Subject Matter***

2. Claims 1-19 are allowed.

3. The following is an examiner's statement of reasons for allowance: Claims 1-19 are allowable over the prior art of record because the Examiner found neither prior art cited in its entirety, nor based on the prior art, found any motivation to combine any of the said prior art which teaches an image processing apparatus comprising: a light source which irradiates an original with a plurality of colors in time-divisional manner; an image reading unit which line-sequentially reads the original and outputs a plurality of color components of image data in units of lines while time-divisionally irradiating the original with the plurality of colors using said light source; a buffer memory; and an image processor which writes the plurality of color components of image data for one line outputted from said image reading unit into said buffer memory, after that, during an image reading period of said image reading unit for a next line, reads out the plurality of color components of the image data for the one line from said buffer memory and performs a masking operation of the read out image data for the one line, respectively as set forth in claims 1, 10, 19 including all of the features recited therein.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany
